**Report N°08 – Hockenheim 2024**

Race 1 tyre pressure report:

Car #7 was measured on the grid with a tyre pressure of 1.28 bar on the rear left tyre using Pirelli reference gauge (see picture attached) and in presence of a scrutineer. This is in breach of Sporting Regulations Article 29.12 as well as BOP decisions.

The team was not able to correct the situation before the 3 mins signal.

The information was communicated to the Race Control and the team required to pit during formation lap to adjust tyres pressure.

The car pitted during formation lap, tyre pressure was corrected and the car rejoined.

All other cars checked on the grid were conform and no tyre pressure was under 1.30 bar.
